The ICCS 2018 is an unparalleled opportunity to discuss Cyber-threat analysis, operations, research, and law enforcement to coordinate various efforts to create a more secure world. The ICCS 2018 serves as a platform for researchers and practitioners from academia, industry, and government to present, discuss, and exchange ideas that address real-world problems with CYBER SECURITY. The conference program will include special sessions, presentations delivered by researchers from the international community, including presentations from keynote speakers and state-of-the-art lectures and keynote speeches.

New technology and methods comes daily to enhance our daily life but as well as technology will increase cyber crime are increasing day by day. For protecting our new technology from new cyber attacks we needs to developed methods that are capable to protect our systems. As we know that old methods are not sufficient to protect our system from new cyber attacks so we need some new methods or merging of some other technology to that we will make our system strengthen.

Special session on **Intensive Cyber Security** will cover all new technological methods implement to enhance cyber security processes. It includes *Machine Learning, Self Learning programs, Artificial Intelligence, Fuzzy systems* etc.

The vision of including these trends is to explore the domain of Cyber security and related aspects through the view of Computerized Intelligence based models.
