Details of proposed session

The main objective of this special session is to present the research from different areas of Computer Networks and Wireless Communication. This special session provides a platform for researchers and scientists across the world to exchange and share their experiences and research results about all aspects of electronics and information technology. This special session also provides an opportunity to interact and establish professional relations for future collaboration. The special session aims to promote innovations and work of researchers, engineers, students and scientists from across the world on Advancement in Computer Networks and Wireless Communication. The basic idea of the special session is what more can be done using the existing technology. In Today's world Computer Networks and Wireless Communication plays an important role for future's innovation.

Areas of Coverage (sub-themes)

The areas of coverage for this special session are:

- Communication & Network

- Mobile ad-hoc networks,
- Coding and Diversity,
- Multicarrier Communication Systems,
- Next generation networking and wireless systems,
- Routing protocols and QoS,
- Cooperative communications,
- Secure communications and Cryptography,
- Space-Time Codes,
- MIMO and Adaptive antennas,
- Multimedia Information Systems,
- Parallel and Distributed Systems,
- Wireless Sensor Networks,
- Optical Wireless and Communications,
